30 AI Prompts for Work & Productivity

Copy-paste prompts for email, meetings, planning, research, and everyday decisions
— each one tested for a specific, common situation, not a generic template.

Writing & Email

1 WRITING & EMAIL

Rewrite this email so it sounds more [confident / friendly / concise] while keeping the same information: [paste email]

💡 Paste your rough draft, not just a topic — the AI edits better than it invents from nothing.

2 WRITING & EMAIL

Turn these bullet points into a short, professional email to [recipient/role] asking for [outcome]: [bullets]

💡 Name the recipient's role (client, manager, vendor) so the tone matches.

3 WRITING & EMAIL

Write 3 subject lines for this email, ranked from most to least direct: [paste email]

💡 Ask for options, then pick — don't accept the first draft as final.

4 WRITING & EMAIL

I need to say no to this request without sounding harsh. Draft a reply: [paste request]

💡 Add "keep it under 80 words" if you tend to get long, apologetic replies.

5 WRITING & EMAIL

Summarize this email thread in 3 bullet points: what happened, what's decided, what's still open. [paste thread]

💡 Great before a meeting when you've lost track of a long thread.

6 WRITING & EMAIL

Proofread this for grammar and clarity only — don't change my tone or word choice: [paste text]

💡 Say "don't change my tone" explicitly, or the AI will smooth out your voice too.

Meetings & Planning

7 MEETINGS & PLANNING

Turn these raw meeting notes into a clean summary with: decisions made, action items (with owners), and open questions. [paste notes]

💡 Even messy, half-sentence notes work — the AI fills in structure, not facts.

8 MEETINGS & PLANNING

I have these tasks for the week: [list]. Help me group them into a realistic daily plan for Mon–Fri, assuming 6 focused hours a day.

💡 Mention any fixed meetings/deadlines so the plan works around them.

9 MEETINGS & PLANNING

Draft a 30-minute meeting agenda for a call about [topic] with [attendees/roles]. Include time boxes.

💡 Time-boxing each item is what keeps meetings from running over — always ask for it.

10 MEETINGS & PLANNING

I'm stuck between [option A] and [option B] for [decision]. List the real trade-offs, not generic pros/cons.

💡 Give the actual constraint (budget, deadline, team size) so the trade-offs are specific to you.

11 MEETINGS & PLANNING

Write a short status update for my manager covering: what I finished, what's in progress, and what I need from them.

💡 Keep this one as a saved template — reuse it weekly and just swap the details.

Research & Learning

12 RESEARCH & LEARNING

Explain [topic] like I'm smart but new to this specific field — no oversimplifying, no jargon left unexplained.

💡 This phrasing avoids both a condescending answer and an overly technical one.

13 RESEARCH & LEARNING

Give me the 5 most important things to understand about [topic] before I start learning it in depth.

💡 Use this before diving into a course or long article — it gives you a map first.

14 RESEARCH & LEARNING

Compare [tool/method/approach A] vs [B] for someone whose goal is [specific goal]. Skip the neutral "it depends" — give a real recommendation.

💡 State your actual goal and constraints; a generic comparison is far less useful than one for your case.

15 RESEARCH & LEARNING

I just read this. Quiz me with 5 questions to check if I actually understood it: [paste article/notes]

💡 Answering forces recall — much stickier than re-reading your notes.

16 RESEARCH & LEARNING

Summarize this in one paragraph for someone with zero background, then in one paragraph for an expert. [paste text]

💡 Useful when you need to explain the same thing to two very different audiences.

Work Documents

17 WORK DOCUMENTS

Turn this messy brain-dump into a structured one-page project brief with: goal, scope, out of scope, timeline, owner. [paste notes]

💡 Works even from voice-to-text notes — don't clean it up yourself first.

18 WORK DOCUMENTS

Write a polite follow-up message for something I sent [X days] ago with no response: [context]

💡 Specify the relationship (client, colleague, vendor) — tone should differ a lot.

19 WORK DOCUMENTS

Create a checklist I can reuse every time I [repeated task, e.g. "onboard a new client"].

💡 Ask it to keep each item to one line — checklists fail when items are paragraphs.

20 WORK DOCUMENTS

Simplify this document so someone outside our team could understand it in one read: [paste document]

💡 Great for anything going to a client, new hire, or another department.

21 WORK DOCUMENTS

Give me 3 versions of this pitch: a 1-sentence version, a 3-sentence version, and a 1-paragraph version. [paste pitch/idea]

💡 Keep all three — different situations call for different lengths.

Problem-Solving

22 PROBLEM-SOLVING

I'm facing this problem: [describe it]. Ask me clarifying questions before suggesting a solution.

💡 Forcing questions first stops the AI from guessing at context it doesn't have.

23 PROBLEM-SOLVING

Play devil's advocate on this plan and find the 3 weakest points: [paste plan]

💡 Much more useful than asking "is this good?", which tends to get a polite yes.

24 PROBLEM-SOLVING

I need to explain a mistake I made to [manager/client] and what I'm doing to fix it. Help me draft this honestly, without over-apologizing.

💡 Ask for "no over-apologizing" explicitly — first drafts tend to grovel.

25 PROBLEM-SOLVING

Break this big, vague goal into 5 concrete first steps I could start this week: [goal]

💡 "This week" forces genuinely small, doable steps instead of another vague roadmap.

26 PROBLEM-SOLVING

Here's my draft reasoning for a decision: [paste reasoning]. Where is the logic weakest?

💡 Use before a big decision you can't easily undo — cheap second opinion.

Personal Productivity

27 PERSONAL PRODUCTIVITY

Here's my to-do list: [list]. Tell me which 3 items actually matter this week and which are safe to drop or delay.

💡 Be honest about your real deadline pressure — the AI can't know what's actually urgent otherwise.

28 PERSONAL PRODUCTIVITY

I keep procrastinating on [task]. Ask me why, then suggest the smallest possible first step.

💡 "Smallest possible step" is the key phrase — it should feel almost too easy to skip.

29 PERSONAL PRODUCTIVITY

Turn this vague goal into a SMART goal: [goal]

💡 Good for personal goals (fitness, saving, learning) as much as work ones.

30 PERSONAL PRODUCTIVITY

Help me write a short, kind message declining this invitation/request without over-explaining: [context]

💡 Ask for "without over-explaining" — most first drafts justify too much.

31 PERSONAL PRODUCTIVITY

I have 90 minutes free and 3 tasks I could do: [list]. Which should I actually do, and why?

💡 Give real context (energy level, deadlines) for a genuinely useful answer, not a coin flip.

How to use this pack

Every prompt has a bracket like **[paste text]** or **[topic]** — replace it with your real content before sending. The more specific your replacement, the better the result.

If the first answer isn't quite right, don't start over — reply with what's wrong: "shorter", "less formal", "keep the second paragraph but redo the first". AI assistants are much better at revising than guessing your preferences upfront.
